

BENEFIT YOUR NONPROFIT RAISE FUNDS AND SAVE ENERGY!

A DTE Energy **HOME ENERGY CONSULTATION** is a smart way to improve the comfort and efficiency of any home. Available to all eligible DTE customers, a Home Energy Consultation will help customers discover where the most energy is being used in the home and learn how to save energy in every room.

A DTE energy expert will visit and provide a personalized overview of ways to save and install energy-saving products, which may include:*

- ENERGY STAR® LED light bulbs
- A programmable thermostat
- Kitchen and bathroom faucet aerators
- Energy efficient showerheads
- Hot water pipe wrap

HOW WILL YOUR NONPROFIT BENEFIT?

For every member/supporter of your organization who completes a Home Energy Consultation, your organization will receive **\$20 (up to \$5,000 per program year)**!

WHAT DOES YOUR NONPROFIT NEED TO DO?

In order to participate, your organization must complete and submit a Memorandum of Understanding and W-9.

Once completed, your Partnership Program Coordinator will provide promotional materials and share ways to promote the program to your members/supporters including presentations and one-on-one assistance.
