Tonight’s program – DENNIS INTRO TO FIBER OPTICS

fiber-optic cables—“pipes” that can carry telephone calls and emails around the world in a seventh of a second! ...A fiber-optic cable is made up of incredibly thin strands of glass or plastic known as optical fibers; one cable can have as few as two strands or as many as several hundred. Each strand is less than a tenth as thick as a human hair and can carry something like 25,000 telephone calls, so an entire fiber-optic cable can easily carry several million calls. I also wrote down $<44.35^\circ$. THIS WAS ON THE TEST. DO I GET AN “A”?

Club Officers

President Rick Baldessari	303.423.1887
Vice President Dewain Wood	303.271.1110
Secretary Cynthia Bauman	720.498.3592
