## **HAVE YOU HEARD OF THE AMAZING NEW TECHNOLOGY CALLED "B.O.O.K"?**

Announcing the new **B**uilt-In **O**rderly **O**rganized **K**nowledge device, tradenamed **BOOK**.

By Laura Pritchett

BOOK is a revolutionary breakthrough in technology: no wires, no electric circuits, no batteries, nothing to be connected or switched on. It's so easy to use, even a child can operate it. Compact and portable, it can be used anywhere -- even sitting in an armchair by the fire -- yet it is powerful enough to hold as much information as a CD-ROM disc.

Here's how it works: BOOK is constructed of sequentially numbered sheets of paper (recyclable), each capable of holding thousands of bits of information. The pages are locked together with a custom-fit device called a binder which keeps the sheets in their correct sequence.

Opaque Paper Technology (OPT) allows manufacturers to use both sides of the sheet, doubling the information density and cutting costs. Each sheet is scanned optically, registering information directly into your brain. A flick of the finger takes you to the next sheet.

BOOK never crashes or requires rebooting, though, like other devices. It can become damaged if coffee is spilled on it.

The "browse" feature allows you to move instantly to any sheet, and move forward or backward as you wish. Many come with an "index" feature, which pin-points the exact location of any selected information for instant retrieval.

An optional "BOOKmark" accessory allows you to open BOOK to the exact place you left it in a previous session -- even if the BOOK has been closed. BOOKmarks fit universal design standards; thus, a single BOOKmark can be used in BOOKs by various manufacturers.

Portable, durable, and affordable, BOOK is being hailed as a precursor of a new entertainment wave. BOOK's appeal seems so certain that thousands of content creators have committed to the platform and investors are reportedly flocking to invest. Look for a flood of new titles soon.

## **MORE LAUGHS...**

Two Reasons Why It's So Hard To Solve A Redneck Murder:

1. The DNA all matches.
2. There are no dental records.

A blonde calls Delta Airlines and asks, 'Can you tell me how long it'll take to fly from San Francisco to New York City?' The agent replies, 'Just a minute.' 'Thank you,' the blonde says, and hangs up.

---

Two Mexican detectives were investigating the murder of Juan Gonzalez. 'How was he killed?' asked one detective. 'With a golf gun,' the other detective replied. 'A golf gun! What is a golf gun?' 'I don't know. But it sure made a hole in Juan.'

---

Moe: 'My wife got me to believe in religion.'

Joe: 'Really?'

Moe: 'Yeah, until I married her I didn't believe in Hell.'

---

A man is recovering from surgery when the Surgical Nurse appears and asks him how he is feeling. 'I'm O. K. But I didn't like the four letter-words the doctor used in surgery,' he answered. 'What did he say,' asked the nurse. 'Oops!'

While shopping for vacation clothes, my husband and I passed a display of bathing suits. It had been at least ten years and twenty pounds since I had even considered buying a bathing suit, so I sought my husband's advice. 'What do you think?' I asked. 'Should I get a bikini or an all-in-one?' 'Better get a bikini,' he replied. 'You'd never get it all in one.'

He's still in intensive care.
